

How to assemble a printable book from Gift of Curiosity

Printable books from Gift of Curiosity are designed to be very simple to assemble, with minimal cutting or other time-intensive labor needed. Please enjoy!

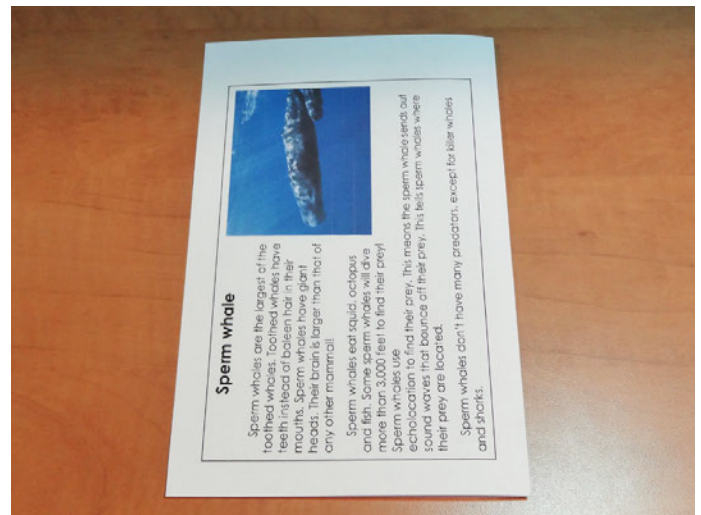

Step 1

Print the pages you wish to include in the book. Use heavy weight paper or cardstock to make the pages as opaque as possible.

Step 2

Fold each page in half, with the text and images facing out.

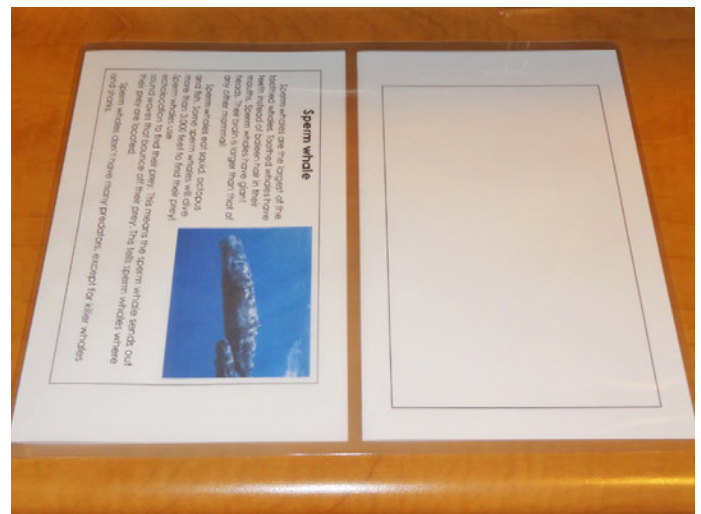

Step 3

Insert folded pages into laminating pocket.

(I can fit two folded pages per laminating pocket. Depending on your laminator you may be able to fit one or two.)

Note: Although I recommend laminating for durability, lamination is optional. *If you do not plan to laminate, skip to step 6.*

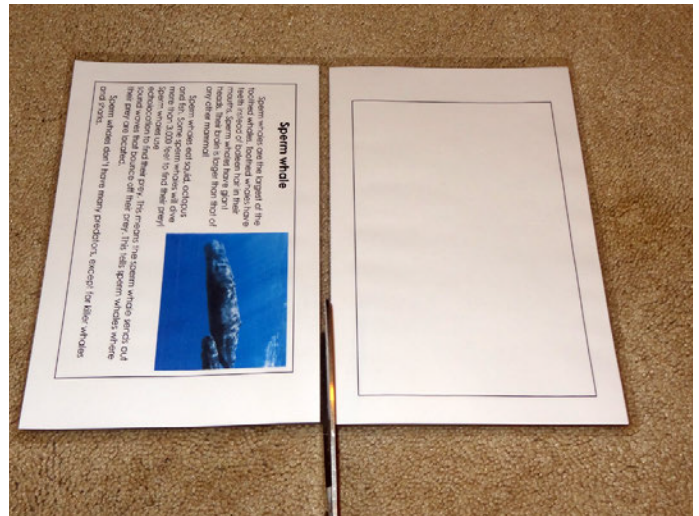

Step 4

Laminate pages.

Step 5

If you laminated two folded sheets of paper in one pocket, cut them apart.

Step 6

Assemble the pages in order.

Step 7

Punch holes along the side of each page. I recommend two holes - one at the top and one at the bottom.

(Skip this step if you plan to bind the book with a comb binding machine.)

Step 8

Select a binding material. Possible options include yarn, rubber bands, O-rings, or a comb-binding machine.

If your book is not laminated, you may even use a stapler.

Step 9

Use your chosen material to bind the book.
